Dear Joshua

I have been invited to the C.S.H. Symposium to discuss a structure for DNA which Francis Crick and I have recently devised (Nature - April 28) I am very pleased about this, especially as it should give me the possibility of talking directly with you about RIL genetics. How long ~~do you~~ plan to be in C.S.H. It would be nice if you could stay for a few days following the meetings, as both Bill Hayes and I plan to remain some days after the formal conclusion. I suspect the meetings themselves will be very hectic (too many talks and parties) and so it would help if we could have a few days of relative peace for discussion. I remain perpetually confused as to the nature of the F^r genotype, especially since talking with Sol about his sonic experiments.

No doubt Estes will be with you. I'm looking forward for a ~~short~~ glimpse of the states after 3 years absence. We get a rather perverted view of it over here until we meet. My best regards.

John
